Tuff Tank is Trinidad and Tobago's leading brand of rotationally moulded water tanks, ideal for multi-purpose use including: short term or long term storage of safe potable water, rainwater harvesting, farm irrigation and backup home water storage in case of emergency.

Tuff Tanks are engineered using a layered system of 100% virgin polyethylene with all materials approved by the F.D.A. Our tanks are constructed to the highest standard, ensuring a dependable and durable tank that is resistant to damage from prolonged exposure to the heat of the sun.

3 LAYER CONSTRUCTION (Black tanks are dual layered)

INNER LAYER: Health Gard® Safety lining has antibacterial properties which prevents bacteria, fungus and algae from forming, ensuring your water is safe to consume.

MIDDLE LAYER: Black material keeps all sunlight out which prevents algae from forming.

OUTER LAYER: Premium outer colour for a beautiful finish. UV resistant, and reduces heat absorption. See standard colours below.

TUFF TOP

Cover can be completely removed to facilitate easy cleaning and is designed with anti-sink features to withstand weight.

TIE DOWNS

4 lugs, one at each shoulder to secure the tank during heavy winds and while in transit.

OFFSET MANWAY COVER

Provides easy plumbing and maintenance access.

4" PORT FOR RAINWATER HARVESTER

Moulded inlet port for easy connection for rainwater harvesting. (Rainwater Harvester sold separately).

STACKABLE DESIGN

The tapered design allows efficient stacking to maximize space when shipping via container or cargo truck providing major savings on freight per gallon/litre.

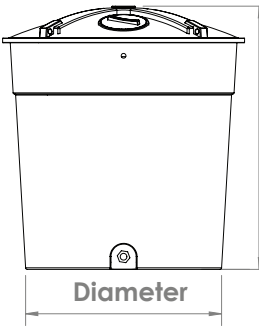

AVAILABLE COLOURS

Black, Blue and White. (Alternative colours are available upon request.)

DIMENSIONS

SIZE	DIAMETER		HEIGHT		CAPACITY		COVER	BULKHEAD
	Inches	Cm	Inches	Cm	Gallon	Litres	Inches	Inches
